

Full-sized protection. Half-sized volume.

Nobivac EDGE® vaccines provide a more comfortable vaccine experience.¹⁻³

0.5-mL vaccines offer the efficacy you expect, plus added comfort for your patients and clients.

- 50% less volume than traditional 1-mL vaccines
- Ideal protection for dogs of all sizes, especially small breeds and puppies

Nobivac EDGE® Lepto₄

The first and only 0.5-mL leptospirosis vaccine specifically shown to be effective against disease, mortality,⁴ and urinary shedding.⁵

Nobivac EDGE® DAPPv + L₄

The first 0.5-mL vaccine to protect against both leptospirosis and parainfluenza⁶—one of the most common respiratory pathogens.⁷

Nobivac EDGE® DAPPv

The first 0.5-mL combination vaccine to include parainfluenza protection.⁶

99% reaction-free vaccinations⁶ thanks to VacciPure™ filtration technology

Fewer total proteins means a more purified final product, which may reduce unwanted immune system responses, such as vaccine reactions.

Designed for every dog. **Perfect for pint-sized patients.**

“The unique nature of Nobivac EDGE[®] vaccines helps me to build trust with pet parents who have been hesitant to vaccinate. The smaller volume creates more comfort for small-breed dogs. It also allows me to practice better preventive medicine and helps me reinforce the importance of one health.”

Natalie L. Marks, DVM, CVJ

Medical Director, Blum Animal Hospital, Chicago, IL

VACCINATE WITH NOBIVAC EDGE[®] VACCINES. VACCINATE WITH PEACE OF MIND.
