

From the manufacturer

**safe-guard<sup>®</sup>**  
(fenbendazole)

The Industry's most trusted  
parasite defense specifically  
approved for goats

**Better Goat Health**

Internal parasite control is the cornerstone of an effective goat health program. SAFE-GUARD<sup>®</sup> (fenbendazole) is the industry's most trusted parasite defense specifically approved for goats.

**Kills the Two Most Common Worm Parasites of Goats**

SAFE-GUARD<sup>®</sup> effectively treats and controls dangerous Barber Pole worms (Haemonchus) and Brown stomach Worm (Teladorsagia).

**Convenient Oral Suspension**

Effective deworming combined with good management can win the war on worms. Convenient oral suspension ensures SAFE-GUARD gets to the digestive system where worms are located.

**Goat Deworming Made Simple.**

SAFE-GUARD<sup>®</sup> 20ml drenching gun makes dosing easy.

**safe-guard<sup>®</sup>**  
(fenbendazole)

**Dosing Done Right**

Body Weight	Amount
<b>Dosing Examples for Goats</b>	
25 lb	0.6 mL
50 lb	1.2 mL
75 lb	1.7 mL
100 lb	2.3 mL
125 lb	2.9 mL

**Deworm your way with SAFE-GUARD.**  
Available in a wide variety of effective formulations.

**IMPORTANT SAFETY INFORMATION:**

Consult your veterinarian for assistance in the diagnosis, treatment and control of parasitism. Goats must not be slaughtered for food within 6 days following treatment. Because a withdrawal time in milk has not been established, do not use in lactating goats. Copyright © 2024 Merck & Co., Inc., Rahway, NJ, USA and its affiliates. All rights reserved.
