

# safe-guard®

(fenbendazole)

SAFE-GUARD® (fenbendazole) Canine Dewormer is effective in the treatment of 6 species of the 4 most common intestinal worm types found in outdoor dogs.

**Tapeworm** (*Taenia pisiformis*)

**Roundworm** (*Toxocara canis* & *Toxascaris leonina*)

**Hookworm** (*Ancylostoma caninum* & *Uncinaria stenocephala*)

**Whipworm** (*Trichuris vulpis*)

Important Safety Information: Consult your veterinarian for assistance in the diagnosis, treatment and control of parasitism. Dogs over six months of age should be dewormed at least twice a year with SAFE-GUARD Canine Dewormer. For puppies younger than six months, see product label. Approximately 1% of dogs had vomiting associated with the use of this product.
