

PRESTIGE® 5 + WNV, PRESTIGE® 3 + WNV, PRESTIGE® WNV

# The Science of West Nile Protection

Formulated to minimize reactions and maximize protection

Customize your West Nile protection to the patient. Choose from multiple antigens plus WNV or monovalent **Prestige® WNV** — all with high degrees of safety for the horse and convenience for you.

## Exceptional safety profile with our smooth Havlogen® adjuvant<sup>1</sup>:

- Uniform suspension for consistency and potency
- Stimulates cell-mediated (T-cells) and humoral (B-cells) immune responses
- Boosts higher, longer-lasting protection through the slow release of antigens

## Advanced filtration process through our Antigen Purification System (APS™)

- Hallmark of Prestige vaccines—proven low reaction rates in field safety trials
- Removes foreign and extraneous proteins and cellular debris
- Allows concentration of antigen while minimizing adverse reactions

## Multiple antigen combinations give you flexibility in meeting client needs

- Reduces need for several injections
- All three WNV vaccines available in 10-dose vials and convenient low-volume 1 mL doses in single, prefilled syringes

Contact your Merck Animal Health or distributor sales representative to learn more.

**PRESTIGE® 5 + WNV**  
(EEE • WEE • Tetanus • EIV • EHV - 1 & 4 • WNV)

**PRESTIGE® 3 + WNV**  
(EEE • WEE • Tetanus • WNV)

**PRESTIGE® WNV**  
(WNV)

# Safety • Efficacy • Convenience

## Gold Standard Challenge Study

In the immunogenicity intrathecal challenge study, the West Nile virus antigen of the Prestige<sup>®</sup> vaccines demonstrated a statistically significant reduction for the following parameters in vaccinates as compared to controls:<sup>1</sup>

### Neurological disease

Incidence (p=0.0368)  
Duration (p=0.0336)

### Encephalitis

Incidence (p=0.0012)  
Severity (p=0.0004)

### Viremia

Incidence (p=0.0202)  
Severity (p=0.0389)

### Rectal body temperatures

Degree (p=0.0001)  
Duration (p=0.0158)

Supporting the label claim, “This product has been shown to be effective for the vaccination of healthy horses 6 months of age or older against West Nile Virus. This product has been shown to be effective against encephalitis and viremia caused by West Nile Virus.”

Merck Animal Health vaccines are backed by our Equine Vaccine Performance Guarantee, proof of our commitment to their efficacy and to the equine veterinarian.
